TITLE

Analysis of access protocols for an automatic meter reading system **Uppal, S and Bucklew, J A** 12

Are new technologies *really* reshaping our organizations? **Taylor, J R and Katambwe, J M** 245

Behavioural approach to OSI system design **Carchiolo, V, Di Stefano, A, Faro, A and Pappalardo, G** 291

British Telecom's ISDN **Brown, H** 177

Broadband ISDN **Fisher, D Maynard, P and Alexander, S** 185

Chat: an N-party talk facility for the Unix 4.2 operating system **Hughes, L** 20

Collision-free protocol for local area networks **Dimopoulos, N J and Wong, E C-W** 208

Communication network optimization **Grout, V M and Sanders, P W** 281

Computer communications for industrial automation: the MAP protocols **Stewart, N** 262

Computer simulation of a packet switching computer network **Bakry, S H, El-Redaisy, B and Al-Turaigi, M** 124

Concurent system analysis using Petri nets: an optimized algorithm for finding net invariants **D'Anna, M and Trigila, S** 215

Current Fieldbus activities **Wood, G G** 118

Data communications network for a merchant bank **Duncan, D** 325

Design and implementation of a LAN monitoring tool **Spanier, S** 85

Design, development and application of an intelligent token **Price, W L and Chorley, B J** 299

Distributed database development **Gretton-Watson, P** 275

Document formatting for interchange between word processors **Ananda, A L** 319

Electronic directory services **Patel, A and Ryan, V** 239

Fibre optic LAN topology, access protocols and standards **Herskowitz, G J and Warms, J G** 227

International extension of ISDN and terminal implications **Peel, E** 171

ISPBXs and terminals **Davies, I and McBain, A** 203

Local area network bridges **Ball, E, Linge, N, Kummer, P and Tasker, R** 115

Modernization of the UK Army fixed telecommunication system **Hoare, A M E** 147

Network management evolution **Terplan, K** 267

Open Systems Interconnection: a migration path **Spencer, P** 65

Open Systems Interconnection: the future prospects **Brown, A and Stratton, T** 80

Optical fibre LANs for mixed data traffic **Senior, J M, Walker, W M and Ryley, A** 3

Performance analysis in local area networks of interconnected token rings **Kuruppillai, R and Bengtson, N** 59

Performance comparison of PC LAN file servers — an experimental study **Poo, G-S and Tan, T-S** 71
Performance investigation of a token passing access protocol for a multichannel optical fibre LAN **Senior, J M, Cusworth, S D and Ryley, A** 304
Private network signalling **Hiett, A and Dangerfield, W** 191
Software architecture of an X.400 electronic mail system **Hammer, D K** 130
Telecommunications development in New Zealand **Hunt, R** 253
TextDirect — a virtual telex system **Dearlove, M J, McInally, I A and Wren, I** 136
The GEC 420 Dataphone — a terminal for the ISDN **McBain, A** 32
Towards the integrated broadband communication network **Casali, F and Treves, S R** 24
Transactions involving multicast **Paliwoda, K** 313
Trends in telecommunication standardization at the European level **Temple, S** 181
User-network interfaces **Davies, D and Rumsey, D** 197
X.25 — the fulcrum for network standardization **Purser, M** 234

SUBJECT

BOOK REVIEWS
Business telematics: corporate networks for the information age **Bellitsos, B and Misra, J** 153
Computer architecture and communications **Willis, N** 331
Digital and analog communication systems **Couch, L W II** 332
Exploiting integrated voice and data networks **Lane, J** 221
Local networks: an introduction **Stallings, W** 93

NETWORKS
Communication network optimization **Grout, V M and Sanders, P W** 281
Local area network bridges **Ball, E, Linge, N, Kummer, P and Tasker, R** 115
Network management evolution **Terplan, K** 267
Optical fibre LANs for mixed data traffic **Senior, J M , Walker, W M and Ryley, A** 3

NEW PRODUCTS IN BRIEF
162, 336

OVERVIEW
Distributed database development **Gretton-Watson, P** 275
Telecommunications development in New Zealand **Hunt, R** 253
Towards the integrated broadband communication network **Casali, F and Treves, S R** 24

PERFORMANCE
Performance analysis in local area networks of interconnected token rings **Kuruppillai, R and Bengtson, N** 59
Performance comparison of PC LAN file servers — an experimental study **Poo, G-S and Tan, T-S** 71
Performance investigation of a token passing access protocol for a multichannel optical fibre LAN **Senior, J M, Cusworth, S D and Ryley, A** 304

PRODUCT DESCRIPTION
Design and implementation of a LAN monitoring tool **Spanier, S** 85
Software architecture of an X.400 electronic mail system **Hammer, D K** 130
TextDirect — a virtual telex system **Dearlove, M J, McInally, I A and Wren, I** 136
The GEC 420 DataPhone — a terminal for the ISDN **McBain, A** 32

PRODUCT REVIEW
Additions to Unix-based superminicomputer's range 43
ASCII to SNA connectivity 102
Computer conference system 101
DEC launches 'enterprise-wide' networking range 335
Dial-up modems with networking management 46
Digital channel occupancy analyser 100
Downtime reduction matrix switch 99
Error correcting modem 45
Ethernet test unit 100
Fax interface 98
Fibre optic modem 44
Handheld terminal 99
IBM compatible E-mail software 99
Industrial discless network 43
Low cost modem 45
Microprocessor-based access to networking system 44
Multiplexer for fibre-optic cabling 45
Network bandwidth manager 101
Office network strategies 101
Open architecture network manager 46
OSI conformant commnications server 46
PC server with Unix multiuser integration 102
Portable communications terminal 102
Practical platform for network standardization 161
Revolutionary high-speed link 161
STEbus modem for remote applications 43
Telexserver for workstations 44
Token bus network interface card 45
Two-port terminal multiplexer 98
X.25 to SNA connection software 100

SECURITY

Design, development and application of an intelligent token **Price, W L and Chorley, B J** 299

SIMULATION

Computer simulation of a packet switching computer network **Bakry, S, El-Redaisy, B and Turaigi, M** 124

STANDARDS AND PROTOCOLS

Analysis of access protocols for an automatic meter reading system **Uppal, S and Bucklew, J A** 12
Behavioural approach to OSI systems design **Carchiolo, V, Di Stefano, A, Faro, A and Pappalardo, G** 291
British Rail updates protocol-analysis equipment 41
BSI quality award 42
Collision-free protocol for local area networks **Dimpoulos, N J and Wong, E C-W** 215
Computer communications for industrial automation: the MAP protocols **Stewart, N** 262
Current Fieldbus activities **Wood, G G** 118
ECMA OSI standards 155
EDI software prototype 103
European standards institute 103
European standardization workshop 103
Eurosinet and Osinet demonstrations 41
FDDI implementation launched 42
Fibre optic LAN topology, access protocols and standards **Henskowitz, G J and Warms, J G** 227
File transfer for Telecom Gold 103
International quality software standards 42
Multi-tasking protocol analyser 42
Open Systems Interconnection: a migration path **Spencer, P** 65
Open systems products announced 41
SGML for text and office systems 42
Trends in telecommunications standardization at the European level **Temple, S** 181
X.25 — the fulcrum for network standardization **Purser, M** 234

TECHNIQUES

Chat: an N-party talk facility for the Unix 4.2 operating system **Hughes, L** 20
Concurrent system analysis using Petri nets: an optimized algorithm for finding net invariants **D'Anna, M and Trigila, S** 215
Document formatting for interchange between word processors **Ananda, A L** 319
Transactions involving multicast **Paliwoda, K** 313

USER FOCUS

Are new technologies *really* reshaping our organizations? **Taylor, J R and Katambwe, J M** 245
Open Systems Interconnection: the future prospects **Brown, A and Stratton, T** 80

BOOKS FROM BUTTERWORTHS

For an up-to-date overview of CD-ROM and CD-I technology . . .

CD-ROM: Fundamentals to Applications

Dr Charles Oppenheim

CD-ROM (compact-disc read-only memory) is the most exciting technological development to affect information specialists since the advent of online systems in the early 1970s. Although a number of books have already appeared on the subject, this is the first one to discuss the technology in detail. Written by a team of international experts, the volume takes the reader through the technology to actual case studies, outlining the problems and solutions other companies have experienced in creating CD-ROM products.

September 1988 304 pages 20 diagrams Hardcover 234 × 156 mm ISBN 0 408 00746 X £45.00

For details of other Butterworth Scientific titles, please contact the appropriate office. Orders should be sent to the appropriate office listed below. The UK headquarters serves all UK and overseas markets except where there is a local Butterworths office.
